## OsKar FumEz Arm Family

OSKAR self-supporting arms provide the most economical and effective methods for the capture of fumes. Contaminants are removed at their source. The use of self-supporting joints, flexible hoses and smooth bore tubing allow for easy placement of the arm's hood near the source of problem. Fume arm tubes are fabricated of steel with cast aluminum joints which include friction disc and are fully adjustable to the workers desired tension. The arms include a handle which completely encircles the hood in order to facilitate easy repositioning from all sides. Hood diameters vary from 160mm/6" on the 75mm/3" arms, to 350mm/14" on the 200mm/8" arms. **All hoods are equipped for installation of an optional light kit.**

### User Friendly features include:

- Adjustments and supports on exterior
- "Grab" handle all around the hood
- Second handle for rotation on the tube
- Air diverter in hood to increase capture velocity
- Heavy Duty 360 degree swivel with safety stop
- Smooth tube construction for lowest pressure drop
- Totally encapsulated lift assist spring
- Heavy Duty cast joints
- Built-in shut off damper in every arm

OSKAR self-supporting arms can be combined with several accessories to provide the best solution for a particular problem:

- swinging extension booms to increase reaches,
- arms with a standing bench mountable flange,
- fans or filtering system,
- brackets for wall hanging mount

### Typical Applications:

- All welding processes
- grinding dusts and most air borne dusts
- polishing, painting, printing
- soldering fumes
- chemical applications such as laboratories (stainless models)
- food and pharmaceutical (stainless models)
